UNITED STATES DEPARTMENT OF AGRICULTURE
Agricultural Research Service ARS 44-8 Revised March 1967

Participants in the NATIONAL TURKEY IMPROVEMENT PLAN

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY

APR 10 1967

CURRENT SERIAL RECORDS

NATIONAL PLAN HATCHERIES
NATIONAL PLAN DEALERS

and Independent Flocks

The publication of this list is for the purpose of developing greater efficiency in the operation of the National Turkey Improvement Plan. Additional information regarding these participants may be obtained by writing to them, or to the Official State Agency in their respective States. Due to the fact that changes frequently occur in this list, it is suggested that anyone desiring to purchase hatching eggs or poults from the listed participants write the Official State Agency for a confirmation of the classification before making such purchase. Supplements to this publication, containing changes in participation, will be published periodically.

Information in this report was compiled by
Animal Husbandry Research Division
Agricultural Research Service

INTRODUCTION

The hatcheries, dealers, and independent flocks listed in this publication are participating in the National Turkey Improvement Plan, according to reports submitted by the Official State Agencies.

The name and address of the Contact Representative and the Official State Agency are shown at the beginning of the list of hatcheries for each of the cooperating States.

The number preceding the name of each State, combined with the number preceding the name of each participant, constitutes the participant's approval number. For example, the approval number for the first hatchery on page 5 for Arkansas is 71-50. The number 71 represents the State of Arkansas, and the number 50 represents Bowen Turkey Hatchery, Route 1, Fayetteville. The assigned numbers may be used for shipping labels, certificates, invoices, and other documents for participant identification. They may also be used as reference numbers for shipments to a Member State of the European Economic Community.

Figures in the column immediately after the name and address of the participant show the capacity of hatcheries or the number of birds in independent flocks. The turkey hatching egg capacity (manufacturers rating for turkey eggs) shown in this column has the following meanings: (1) For exclusively turkey hatcheries, the combined capacity for incubating and hatching is shown; (2) for hatcheries that incubate and hatch both chicken and turkey eggs and use separate machines for each, the combined incubating and hatching capacity of machines used to hatch turkey eggs is shown; and (3) for hatcheries that hatch chicken and turkey eggs in the same machines, an estimate of the capacity used for turkey eggs is shown.

The following abbreviations indicate the type of products each dealer offers for sale:

DE - Hatching egg dealer
DP - Poult dealer
DEP - Dealer in both hatching eggs and poults.

The disease-control classification for which a hatchery or a dealer's products qualify is shown in the column headed "Disease control" by letter symbols as follows: PT, U.S. Pullorum-Typhoid Clean; MG, U.S. M. Gallisepticum Tested; and T, U.S. Typhimurium Controlled.

Letter symbols that appear under the appropriate classification headings show the variety or type of stock produced by the participant. Numerals used with the letters indicate the strain or trade name. Crosses are designated by combining letter symbols and numerals of both parent stocks, listing the male first. Letters and numerals used to identify the stocks are shown in the tabulations that follow.
